

# Mrs. Thiessen's 4<sup>th</sup> Grade Classroom

Hi Everyone,

This week was another great week in the books! Students had their first Friday Movie Feature this week and they loved it. Students are also doing a great job at our math rotations and learning how to work in their small groups, as well as our daily 5 literacy rotations.

● **Spelling** - We had our first spelling test this week and everyone did great! We won't have a spelling test this coming week, but will still work on a list in class. I will also make sure that our next take home list is up on the website so parents have access to it.

**Planners** - Are coming home every night with your student. Please make sure that you are signing it for them and that you have reviewed any homework or notes that might be in it for the day. Again, students will be writing in their spelling words into their planners since this comes home everyday.

**Tech** - Students had their first tech class with Ms. Husing this week. They are excited about being able to use more tech in the classroom and work on projects as well.

Class communication is very important and I have set up multiple ways for you to not only communicate with myself but see what your student is doing through the day.

- 1) Our class website will always have a weekly newsletter letting you know what we did that week. It will also have important information for upcoming things in the district, school and our room.  
<http://mrst-classroom.weebly.com/>
- 2) Our class facebook page is another quick way for you to see what we are doing throughout the day as well. This is a fun way of keeping extended family involved as well.  
<https://www.facebook.com/Mrs-Thiessens-Classroom-621762431804873>
- 3) Remind is a quick form of communication where I can push reminders out to you or where you can "text" me. Our class code is: 9b6ba8

Please do not feel that you need to use every form of communication. The most important one will be our class website where it will have all of the information that you need, I will NOT be sending weekly newsletters via email.

## This coming week...

**Math:** We will be finishing our chapter on Adding & Subtracting whole numbers - Students will be taking their Topic 2 math test on Friday.

**Reading:** We will be working on Inferencing this week, which is taking knowledge from text. We will also continue to work on vocabulary and definition understanding.

**Writing/Grammar:** We will be continuing our work on our TDA or Dependant Analysis this week.

**Science:** We will continue our investigation about different soils and weathering along with land formations.

**Nebraska History:** What is history? We will be discussing the topic history. Diving into maps as well as Nebraska's geographic regions.

I can't wait to see what all of your young minds learn and experience this upcoming week!

Mrs. T
