

Mrs. Thiessen's 4th Grade Classroom

Happy Picture Week!

This week was another great week in the books. Students are working hard and getting used to everything that we are doing in the classroom. Our topic 2 math test as well as our spelling test from today should have been sent home. You also had a torch-run informational packet that was sent home today as well. We completed another Friday feature that involved the Statue of Liberty, going back into our topic of science and chemical erosion.

Spelling - We worked this week on another spelling list in class. Below is our next spelling grouping over 'Long i', which we will test on next Friday, September 25th. I have also posted the list on our class facebook page, this way parents have a quick and easy way of getting the list every week.

Drive	Slight	Twice	Climb	Pry	Prime	Fright
Sly	Spy	File	Pride	Inside	Sigh	Die
Height	Wipe	Shy	Pies	Kite		

Planners - Planners should be filled out and reflect what we do during the day. Homework should be highlighted, however it can also be bubbled (as this is what we do on our white board in the room). Students should also be reading 10-15 minutes a day as part of their homework as well. We have also been working on a few different math applications that students know how to log into. They are more than welcome to log in and work on any of these as well.

Tech - We are continuing with our weekly class time with Ms. Housing our tech specialist and students will be starting their individual projects with her soon. More information to come on this!

Inclement Weather - As we've found out this week our weather changes quickly. Please make sure that students bring with them the proper clothing for changing weather. We try to go out unless the temperature drops, this could mean that we are outside in rain/mist like weather.

Mrs. Thiessen's 4th Grade Classroom

Class communication is very important and I have set up multiple ways for you to not only communicate with myself but see what your student is doing through the day.

1) Our class website will always have a weekly newsletter letting you know what we did that week. It will also have important information for upcoming things in the district, school and our room.

<http://mrst-classroom.weebly.com/>

2) Our class facebook page is another quick way for you to see what we are doing throughout the day as well. This is a fun way of keeping extended family involved as well.

<https://www.facebook.com/Mrs-Thiessens-Classroom-621762431804873>

3) Remind is a quick form of communication where I can push reminders out to you or where you can “text” me.

Our class code is: 9b6ba8

Please do not feel that you need to use every form of communication. The most important one will be our class website where it will have all of the information that you need, I will NOT be sending weekly newsletters via email.

This coming week...

Math: We will continue on our topic 3; Using strategies and properties to multiply by 1-digit numbers.

Reading: We will be working on poetry and wrapping up our unit with our Unit 1 topic test as well.

Writing/Grammar: We will be continuing our work on our TDA or Dependant Analysis this week and our grammar bootcamp.

Science: We will continue our investigation about different soils and weathering along with land formations.

Nebraska History: What is history? We will be discussing the topic history. Diving into maps as well as finishing Nebraska's geographic regions.

I can't wait to see what all of your young minds learn and experience this upcoming week!
